

See Green, CB East's environmental club, is dedicated to spreading eco-awareness through projects devoted to creating a greener community. See Green plans to raise funds to support the Civic Association's up and coming community garden in Buckingham, PA with the sale of sustainable fashion tees. A portion of the organic produce from this garden will benefit local food banks, providing fresh, local produce to those who would not have had the opportunity otherwise.

Fast Facts:

According to WHO, three of the most hazardous insecticides are used in the production of cotton — making it the world's "dirtiest crop".¹

Cotton covers 2.5% of the world's cultivated land yet it uses 16% of the world's insecticides.¹

It only takes 19 PET bottles to produce one XL T-shirt.²
