# Welcome!

- Imagine being able to recognize the health and vibrancy of water?
- What if caring for the water in our glass or surrounding bodies of water generated a deeper connection to nature and ourselves?
- What would happen if small groups of people started caring for the energy of water and could actually raise the frequency of H<sub>2</sub>O with intention?
- Could it even be possible to feel a deeper connection to wildlife and the sky?
- Our **Water Clearing Project** started in 2020, but the technology, research and training began many years earlier.

What if we had the awareness that all things had mind  
body and spirit?

Imagine looking at the world and knowing all things have  
consciousness?

Would it change how we interacted with the world

## H2O

- 71% of earth's surface is water.
- The water cycle shows continuous movement of water within the earth and atmosphere.
- Liquid water evaporates into water vapor then condenses to form clouds and precipitates back to earth, collects and infiltrates.
- Versatile as it is a solid liquid and gas.

Holistic Clearing Solutions

# The Consciousness of Water *Kerri Kleinworth*

- Water's molecular polarity, with hydrogen being a positive electrical charge and oxygen being negative.
- It makes a great solvent and can dissolve other molecules like salt (NaCl)
- Capable of dissolving more substances than any other liquid.
- Allows organisms to obtain chemicals from surroundings, break down food, grow and reproduce

Holistic Clearing Solutions

# The Consciousness of Water *Kerri Kleinworth*

- H<sub>2</sub>O makes up 70% of total cell mass
- We are 62% water
- Water breaks down food, carries nutrients around our body, and carries waste away.
- Our kidneys filter out substances. Water flushes out that stuff from our kidneys

## What Does Water do for You?

Forms saliva (digestion)

Keeps mucosal membranes moist

Allows body's cells to grow, reproduce and survive

Flushes body waste, mainly in urine

Lubricates joints

Water is the major component of most body parts

Needed by the brain to manufacture hormones and neurotransmitters

Regulates body temperature (sweating and respiration)

Acts as a shock absorber for brain and spinal cord

Converts food to components needed for survival - digestion

Helps deliver oxygen all over the body

# The Consciousness of Water *Kerri Kleinworth*

**What is consciousness?**

*A Flow That Goes Through All Matter*

**Let's look at nature.**

Water is life. Its soluble nature moves across many platforms bringing chemical reactions we see in all that exist. It is the carrier of nutrients necessary for life.

Plants and trees suck up water from its roots. The tree is the structure, the water giving it life.

Water reanimates moss and microscopic organisms (rotifers) that lie dormant for years, as it does we may be observing consciousness inhabiting a structure.

The moss has its genetic instructions, water brings it back to life. Water activates the rotifers. The water metabolizes the rotifer so it can use the sun to fuel up.

## The Water Crystal Experiments

Dr Masaru Emoto Author of the *Hidden Messages In Water*, hypothesized that **human consciousness could affect the molecular structure of water**. He demonstrated polluted water can be cleaned through prayer and positive visualization.

He conducted experiments by **freezing water** then viewing the **water crystals** that formed within the first two minutes of defrost under a high powered microscope with a camera.

He **experimented with people thinking** on the specific water sample as well as writing words on samples and playing different music. He experimented with **spring water, tap water and polluted water**.

**Polluted Fujiwara Dam water crystals before and after buddist monks prayed for restoration.** Their chanting coupled with intention seems to have restored the water to its natural harmonious geometric symmetry.

## The Tools *Lynn Diane Cheiffo*

Up next is our friend **Lynn Diane Cheiffo** who is showing the tools we use during our **water** clearing projects to measure the frequency of **water**.

---

---

# Holistic Clearing Solutions

---

# The Tools *Lynn Diane Cheiffo*

- Lynn has always had a strong connection to subtle energies around her.
  - She is an intuitive empath and spiritual mentor with vast life experiences.
  - She believes that through healing herself it heals the world around her and contributes to the collective.
  - She believes in the power of intention and co-creation.
  - Lynn has found a group of amazing women that share in a vision of a beautiful pristine world.
  - Through this group we are taking action to elevate the consciousness and memory or water. **And So Can You!**

What are the tools we are using to  
measure water?

---

---

Holistic Clearing Solutions

---

# Measuring Water Consciousness *Lynn Diane Cheiffo*

- **Pendulums** have been used for thousands of years.
- They are widely used today in **government** and **commercial** ventures such as dowsing for earth minerals and water.
- You can **make** a pendulum using a string or a chain and any weighted object.

---

Holistic Clearing Solutions

---

# Measuring Water Consciousness *Lynn Diane Cheiffo*

- We use a pendulum with the **Bovis Biometer** and the **Attractor Field Dynamics Level of Consciousness**, shown in the next slides.
- When you are centered and **connected to your higher self**, you ask **permission to dowse** and ask if you should dowse. There should be **no attachment to an outcome**.
- All knowledge, wisdom and information is readily available and **using the pendulum as a tool can acquire that information**.

---

---

Holistic Clearing Solutions

# Measuring Water Consciousness *Lynn Diane Cheiffo*

**The Bovis biometer** is a tool that measures the life force energy of people, places and things.

Holistic Clearing Solutions

---

# Measuring Water Consciousness *Lynn Diane Cheiffo*

- The **Bovis Biometer** measures **Natural Earth Energy**.
- The Earth can create biophotons, (light particles) in the range of 7,000-18,000.
- Readings 6,500 and under are in the negative energy range and can have a negative effect on health.
- Above 6,500 the energy gradually becomes more positive and can have beneficial effects.
- Optimally a human will be recharged with a reading of 8,500.

---

---

Holistic Clearing Solutions

# Measuring Water Consciousness *Lynn Diane Cheiffo*

- **200** is the level of courage.
- It is in the neutral range and is associated with the **emotional state of affirmation**, with a view of life as Feasible.
- Below that is in the negative range and above frequencies can reach an **energetic frequency of enlightenment**.

## Map Of Consciousness

This map shows the **emotional state** and the **view of life** associated with the readings we dowse using the **A. F. D. level of consciousness chart**
